

A range of well covers provides a good level of security and cost effectiveness.

Featuring a hinged lid with a large clear aperture and a bottom skirt, Stop Cock Covers are designed to be installed flush with grade. A simple locking device provides added security and minimises technician's time during sampling and monitoring.

Available in several standard sizes as well as custom made to suit individual project requirements. Certain sizes are marked 'Monitoring Well' for clear identification and to avoid any unauthorised access.

Applications

- Monitoring Wells

Features

- Robust
- Easy to install
- Badged for extra security
- Lockable
- Pedestrian rated A15
