

The Type EF wellhead is manufactured from landfill gas-resistant polyethylene.

It comprises a 500mm long, 225mm diameter body with a 63mm outlet and 2" Spears gate valve, a Tefen gas sampling port and a top flange plate fitted with wing nuts for quick and easy removal. The top flange plate has a 2" threaded cap and dipping port for measuring leachate levels within the well.

It can be fitted to vertical wells, either by flexible coupler, thread or flange.

Applications

- Landfill gas extraction systems

Features

- Simple construction
- Easy to install
- Removable flange
- Flow control at wellhead
- Leachate dipping port
- Provision for pump installation
- Pump support hook

Dimensions								
Model	Diameter (mm)	Length (mm)	Top polo flange diameter (mm)	Well connection (mm)	Dipping port	Gas sampling port	Flow control	Main connection (mm)
LFG-WH-EFIP	225	500	335	Flex Coupler	2" cap	Tefen	90	63mm x 2m flexible
LFG-WH-EF2T	225	500	335	Thread	2" cap	Tefen	90	63mm x 2m flexible
LFG-WH-EF3F	225	500	335	Flange	2" cap	Tefen	63	63mm x 2m flexible
