

## Applications

- Reinforced concrete
- General concrete
- Asphalt coring

## Features

- Made in the UK
- Fast penetration rate
- Long life
- Wide range
- Re-tip service available

## Accessories

- 1 1/4" UNC to 2 3/8" REG or NWY adaptor
- 1m x 54mm multi-purpose rod
- Hydraulic power pack and tooling available

Thin-walled, solid back end diamond core bits for drilling concrete, asphalt and masonry materials.

Bits may be supplied either with Open Back-End (O.B.E.) or Solid Back-End (S.B.E.) with standard 1 1/4" UNC female connection.

A wide range of standard diameters include 102, 142, 152, 300 & 450mm but other sizes are available on request.

Standard length is 450mm.

### Three options are available:

**Red** - Flint and river gravel, reinforced concrete. Very fast cutting with good bit life.

**Blue** - General concrete, river gravel, granite, limestone. Good cutting speed and extended life.

**Black** - Asphalt & other abrasive materials.
